

# Leaving our mark

For 140 years and four generations we are driven by our passion; to preserve and pass on a **UNIQUE TRADITION**.

A tradition that underpins how we do things, creating with quality, Italian-ness and care, putting **PEOPLE** and **ENVIRONMENT** at the heart of everything we do. This is why we have established our **SUSTAINABILITY COMMITTEE**, which now defines our goals and guides our actions.

**It's an ambitious journey, which seeks to leave a tangible and positive mark, making our coffee part of a great future.**

---

## AS A RESULT:

### **We are dedicated to sustainable coffee.**

We select only the finest origins and roast them slowly according to tradition, safeguarding a unique production process that is increasingly focused on the use of sustainable raw materials, food safety and carefully monitored ethical work practices.

### **We are committed to a circular economy.**

Our production and innovation are focused on the use of recycled and recyclable materials, so our used products can be reused as resources or disposed of in complete harmony with the environment.

### **We care for people.**

We're building a future that creates value for people – from employees to business partners and suppliers with whom we share values of respect, ethical working, and transparency. In particular we care about women, those employed in coffee producing communities and close to us, for whom we champion education and equal employment opportunities.
